## Materials

Spreadsheet Solutions

Input the details for each product in the each column with a red header. Make sure that each entry has a unique material code. Each code should be a code that can be used to refer to each material, so you should be able to know which code to use (from a list) when requiring a specific product. The more details you fill in, the more this spreadsheet will calculate for you. You can use the filters to sort the data by any red column of your choice.

*Required field		*Eg. Packaging		*Exc VAT				
Material Code	Material Description	Accessory	Unit	Unit Price	Supplier Name	Supplier Code	Warning	
Small Basket	Wooden basket with handle - Small	✓	Each	£3.00

Blue Pacifier	Baby pacifier - Blue		Each	£2.50				
Pink Pacifier	Baby pacifier - Pink		Each	£2.50				
Yellow Pacifier	Baby pacifier - Yellow		Each	£2.50				

Use the material database to list up to 2500 materials which you could use in each product. This includes 'gift materials' (whatever is in your hampers or gift baskets) and 'accessory materials' (the baskets themselves or the packaging). You can name each material, give it a unique, easy to remember code, and assign details such as the price, unit type, supplier and supplier codes. You can also assign 'accessory materials' as such, which will give you a more detailed report later on. Each material entered here, will be available for selection on each product.

## Products

Spreadsheet Solutions

Fill in the red fields, making sure to not have any duplicate product codes. Each line should be a new and unique product, adding as many materials (blue sections) as required, up to a maximum of 30 different types. In each case, select the material code, and input how many of each material will be required.

*Exc VAT	*Required Field	*Exc VAT	*Category	Material 1		Material 2		Material		
Warning	Product Price	Product Code	Product Name	Labour Cost	Markup	Material Code	Qty	Material Code	Qty	Material Code
	£70.80	Small Standard - B	Small Standard Gift Basket - Boy	£30.00	C	Small Basket	1	Blue Plastic	1	Blue Ribbon
	£82.50	Medium Standard - G	Medium Standard Gift Basket - Girl	£30.00	C	Medium Basket	1	Pink Plastic	1.5	Pink Ribbon
	£94.20	Large Standard - N	Large Standard Gift Basket - Neutral	£30.00	C	Large Basket	1	Yellow Plastic	2	Yellow Ribbon

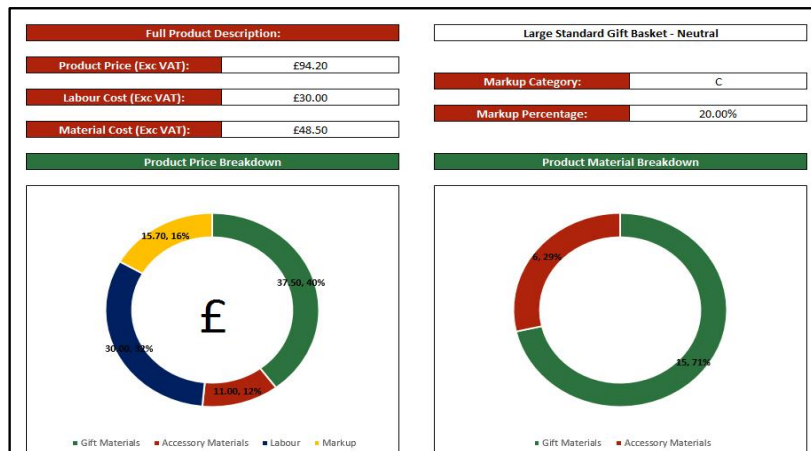

Adding products is just as easy, simple give the product a name, a unique and easy to remember code and a labour cost and markup code. The markup codes can all be assigned a specific percentage in order to determine the markup of the product. You then have up to 30 'spaces' to fill with whichever materials you desire. Simple click on each space and select which of your materials you would like to fill that space, and how many of that material are required. You can use the same material over various products.

Upon doing this, you will see your product price (in the green) calculating as you fill in details. This price will always be kept up to date. If a material changes price, simply change that price on the material list, and the product price will change accordingly. Simple.

This is the materials list (above). Whatever items appear on your order form, will be broken down to materials on this list. Again, suited to be printed, you can print out a materials list for each order. This will show you have many of each material is required for the entire order. Making it easier to plan and prepare to put each order together!

Lastly, there is a product lookup sheet, where you can select a desired product from the drop down list, and view all aspects of that product. You can see the cost breakdown, or the materials breakdown, as well as the various prices of the various aspects. You can also view a complete material breakdown for that product. All of this is automatically calculated from the databases, as you select the product code.

As these are spreadsheets, and not programmed software, you can decide how you use them. Each spreadsheet can be saved into the file of your choice, and renamed as desired. You can set up your own system, to your own requirements, and then use the spreadsheets within that system. You can use as many of these spreadsheets as you require within your business, and you can choose which staff have access to them.
