To the left is a place to insert up to 10 suppliers. You will later have the opportunity to allocate a price for each item to each supplier. Please ensure that you do not list the same supplier more than once, if you do, you'll see a red cross.

To the right is a place to show whether the prices you are using are inclusive or exclusive of VAT. Please select one option, and then make sure that ALL prices entered into this spreadsheet conform to your selection.

**Select Price Option:**  Including VAT

First thing is first, you can list up to 10 suppliers to monitor. The idea is to put suppliers who provide you with like for like items, so not suppliers who supply unique products, but competitive suppliers. This way you would be able to compare any purchased products between the listed suppliers.

You can also decide if the figures used in this spreadsheet are exclusive or inclusive of VAT.

**All Prices Including VAT**

You can input a list of up to 1000 products here, in order to compare prices between suppliers. Please ensure that each line contains a unique product. Each product description should contain ALL information, such as the weight, volume or size of the product. Then ensure that ALL the prices along side that product relate to the exact same product from all of the suppliers. For example, don't have the price for a file for one supplier, and a pack of 10 files for another. Make sure you are comparing like for like. Add as many products as is required, up to 1000, and then add as many supplier prices as you can, if a certain supplier does not supply any given product, simply leave the relevant space blank.

You can then list your required products, up to 1000 of them in fact. Once you have the products listed, you can assign a price for each product from each of the 10 suppliers. This is why it is important to list products that can be compared like for like. If a specific supplier does not provide a certain product, simply leave that cell blank and move on. This process can be time consuming, but even just doing this can show you how some suppliers compare price wise. This stage alone can show you some interesting data.

Once you've listed your products, and assigned prices, you're ready to move on to the exciting part.

## Required Products List

As you enter the required products, quantities and your preferred suppliers, you can see the information change accordingly. You can then view the Comparison Report, make your selection, and see the final choices below.

### Your Business

Please select the required products below, each product on a new line. You can then state how many of each item is required in the Qty column. Lastly, simply check which recommended supplier is stated, and the price. You have the opportunity to over-ride any supplier, by simply selecting the preferred supplier for any product. You will then see that the supplier used will change accordingly. You over-rides will be taken into consideration when selecting the 'Custom List' option on the Comparison Report page.

### Your Choice of Suppliers:

Total: £771.00

Product Item 589	4		Supplier 8	Supplier 8	£44.00	✓
Product Item 876	2	Supplier 4	Supplier 6	Supplier 4	£38.00	✓
Product Item 449	5		Supplier 3	Supplier 3	£50.00	✓
Product Item 7	1		Supplier 1	Supplier 1	£13.00	✓
Product Item 39	5		Supplier 6	Supplier 6	£60.00	✓
Product Item 998	5		Supplier 8	Supplier 8	£50.00	✓

You can then select the required items on your 'shopping list'. Simply select a new product on each line from the drop down list, and state how many are required. You fill in the red sections, and the green ones will populate accordingly. You can also over-ride a supplier for any product. The spreadsheet will show you the cheapest supplier for each item, but that doesn't necessarily mean they're the best. You know what you want, so you can over-ride the preferred supplier, in order to determine where you buy your products. You can then see who you have selected, and also see the total price for all the items, based on the supplier used.

## Price Comparison Report

### Your Business

Please Select Your Choice Once You Have Viewed the Options Below:

There is also a report. Once you have stated your preferred suppliers, and completed your list of required products, you can view the report. As you can see, there are 12 options. Either buy each item from the cheapest supplier, or you can use your preferred suppliers (and the cheapest for those not specified), or you can pick an individual supplier and get all the items from them (using the cheapest supplier if they don't have any item). The report shows you all of the prices, so that you can select an option.

Option 1	
Option Name:	<b>Cheapest Option</b>
This option will use the cheapest supplier for each product, it will simply assign the supplier at the lowest price for each product.

This Option's Rank:	<b>6</b>

Not only does it show the prices, but it also shows what each option contains, and how many of the required products are available from the chosen supplier (if you go for that option). This means that you'll have 12 options from which to choose, with information on each option. All you need to do is make your choice from the drop down list, and the information on the Required Product List will update as per your selection. You're now ready to order.

## Purchase Order Items

Your Business

Once you have decided what you require, and you have made your choice regarding suppliers, simply select each supplier in turn, to see the unique set of items per supplier, in order to place your purchase order. Don't miss out any suppliers!

Supplier Name (Please Select)				
Supplier 8		Total Order Price:	£184.00	
Including VAT				
No	Required Products	Qty	Unit Price	Line Price
1	Product Item 917	4	£11.00	£44.00
