You can input the details for up to 2500 products. Not only the product name, code, and selling price, but also the cost of the product, other costs (P&P, etc), labour (how much time you spend on the product), and your hourly rate. Then all you need to do is a quantity sold for your sales period. The spreadsheet will then analyse the figures, and produce many reports for you. Not only will you see some calculated values for each product, but everything from here on in the brochure will be calculated automatically, all you need to do is make the odd selection.

The first sheet shows all of your products ranked in order, based on any one of 4 criteria. You can rank the products by any of the following:

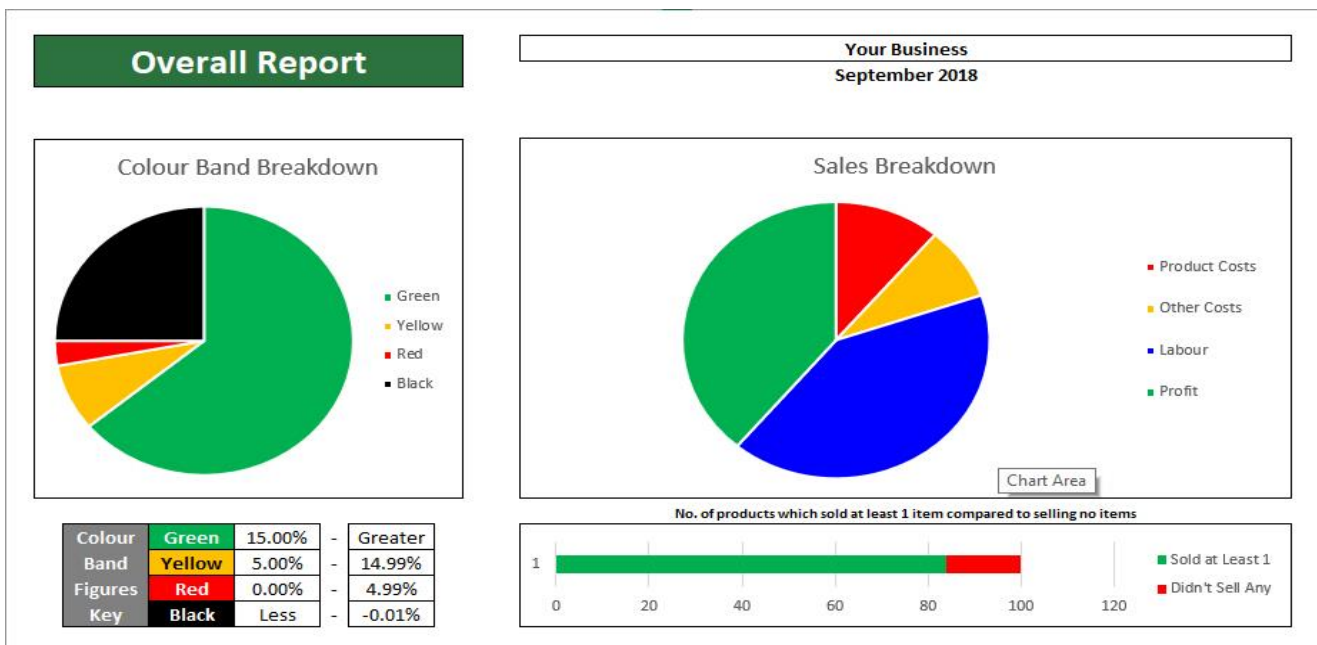

1. Profit / Unit
2. Margin / Unit
3. Total Profit (based on number of units sold)
4. Percentage of Total (each product as the % of the Total of ALL sales)

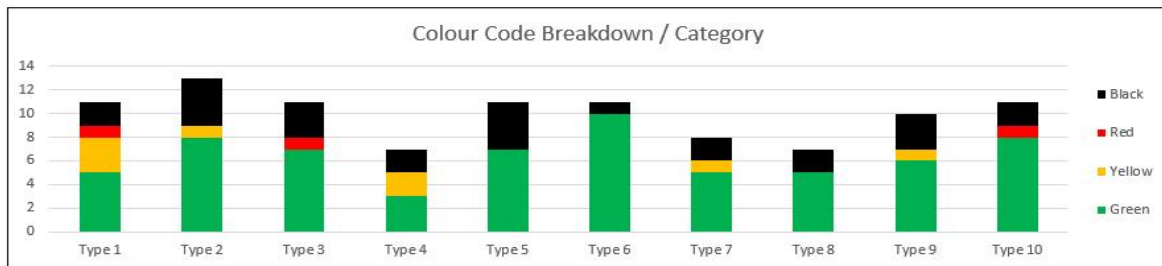

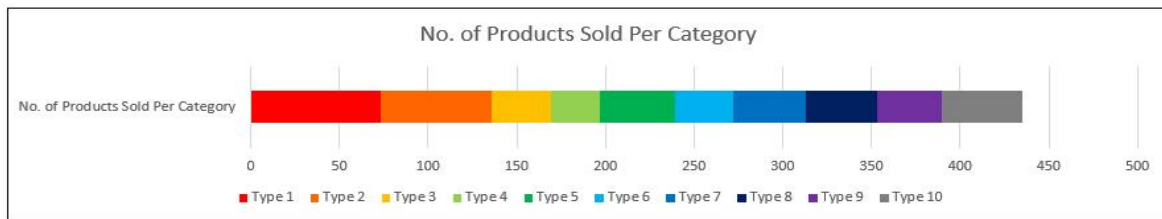

Simply make the selection, and see all of your products ranked in order of success, as well as categorised into one of 4 colour groups.

The next page allows you to select any product, and see all the details relating to that product. Not only does it show you all of the figures and percentages, but also which colour category it falls into.

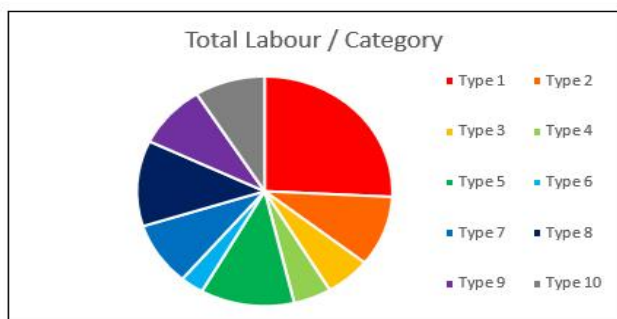

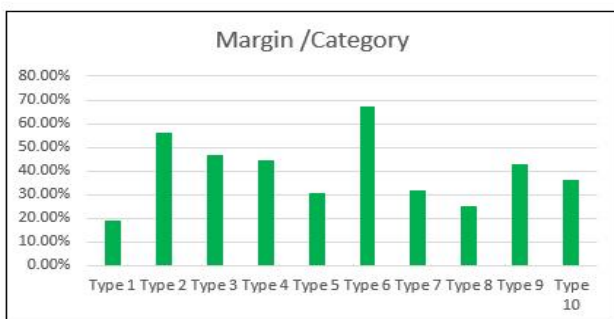

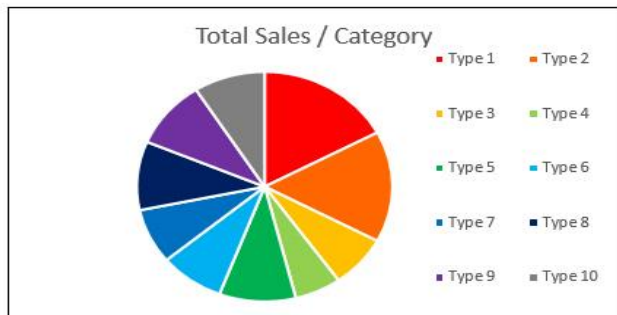

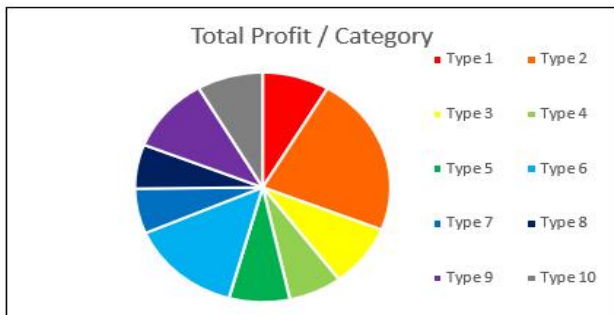

The colour categories are 'traffic light' system of green, yellow, and red (and black), and they depend on the margin percentage of each profit. You can set the values to customise them to your requirements.

Then we have a report, based on categories. You can assign each product to a category (up to 10 categories), and then see the results. This means that categorising your products, can show you some very interesting reports per category.

The first one show a breakdown of the colour groups per category, as well as how many products you have in each, and how many products you've sold in each.

Also, you can see labour, sales and profits per category. This allows you to see which categories of products are selling, which ones are making you money, which ones are high in labour, and how they all compare. It is easy to spot key information such as you're selling few items, but you're making high profits, because the labour content is low. That enable you to make decisions regarding that group of products.

So there you have it, an overview of this unique product. We can't show you everything in this brochure, so please use the link below to the demo video, should you wish to see exactly how this product works.
